Professional Summary

Computer Science undergraduate with hands-on experience in Full-Stack Web Development using the MERN stack. Skilled in building responsive web applications, REST APIs, database-driven systems, and modern frontend interfaces using React.js. Completed multiple industry job simulations across software engineering, cloud computing, data analytics, cybersecurity, and Generative AI domains. Strong foundation in Data Structures & Algorithms, DBMS, Operating Systems, and software development best practices.

Education

Medi-Caps University, Indore

Bachelor of Technology (B.Tech) – Computer Science Engineering

2026 – Present

CGPA: 6.96/10

Technical Skills

Languages: Java, JavaScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Cloud & AI: Cloud Computing, Data Analytics, Data Visualization, Generative AI

Projects

Background Removal Web Application

MERN Stack

- Developed a full-stack application that automatically removes image backgrounds through a responsive web interface.
- Implemented image upload workflows, backend processing services, and REST API integration.
- Built using React.js, Node.js, Express.js, MongoDB, and Tailwind CSS.

Imagify – Image Enhancement Platform

MERN Stack

- Developed an image optimization platform supporting image enhancement, compression, and resizing.
- Integrated frontend and backend services to create seamless image-processing workflows.
- Designed responsive user interfaces and deployed the application for public use.

Industry Experience

JP Morgan Chase & Co. – Software Engineering Job Simulation

- Implemented REST APIs, Kafka integration, H2 database connectivity, and backend controllers.

Walmart Global Tech – Advanced Software Engineering Simulation

- Applied software architecture principles, relational database design, advanced data structures, and data processing.

Citi – Technology Software Development Simulation

- Created software state diagrams, feature proposals, live data visualizations, and web-based data queries.

Skyscanner – Software Engineering Simulation

- Developed React applications, microservices, and user-focused travel platform components.

Wells Fargo – Software Engineering Simulation

- Designed and implemented scalable software data models following engineering best practices.

TATA & BCG X – Data Analytics and Generative AI Simulations

- Performed exploratory data analysis, business reporting, visualization, AI-powered solution development, and GenAI applications.

Deloitte – Technology and Cybersecurity Simulations

- Completed development and cybersecurity tasks involving software engineering and security fundamentals.

Certifications

- NPTEL Cloud Computing (Elite) – IIT Kharagpur
- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp
- Advanced Data Structures and Algorithms
- MERN Stack Development
